Learn Software, Hardware and create a network. from the beginning until you can connect

PORTRFOLIO

● Coffee Express

This project was done as a team, and I myself worked as a Front End, and was built with Next.Js and Express.Js. This project was also made to make it easier for coffee connoisseurs to feel coffee at home but it feels like in a cafe

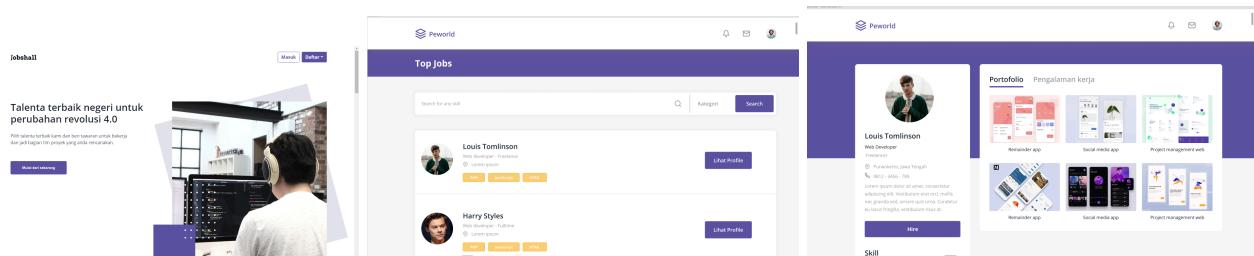

Github : <https://github.com/doyzfin/coffee-frontend>

Link : <https://coffee-frontend.vercel.app>

● Jobshall

This application is intended as a bridge between job seekers and recruiters, built with React.Js and Express.Js. This application was made as a team, and I am in this application as the frontend.

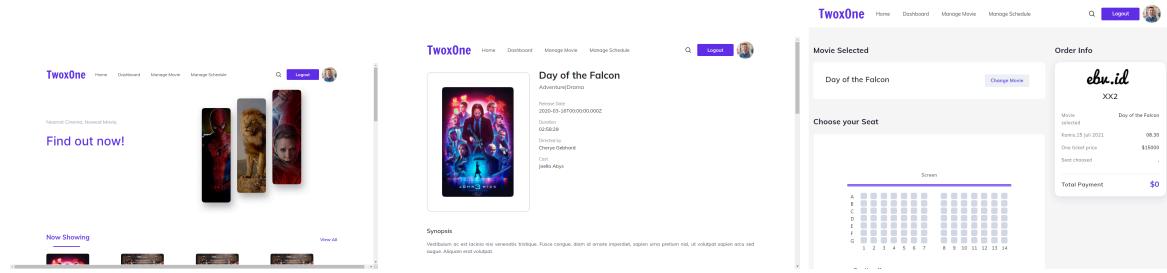

Github : <https://github.com/twicks95/frontend-jobshall-app>

Link : <https://jobshall.netlify.app/>

● Twoxone

Fast, easy and practical application for buying movie tickets. built with React.Js and Express.Js. This application is done individually within one week.

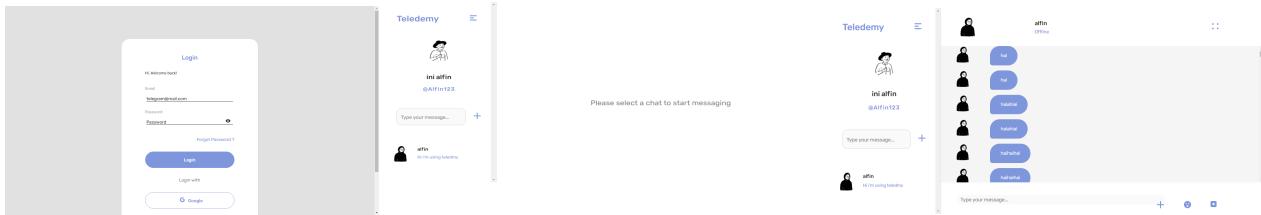

Github : <https://github.com/doyzfin/TwoxOne-FrontEnd>

Link : <https://twoxone.netlify.app/>

● Teledemy

Realtime chat application with profile edit feature, and real time chat. This application was built with React.Js and Express.Js and was done individually with one week processing time.

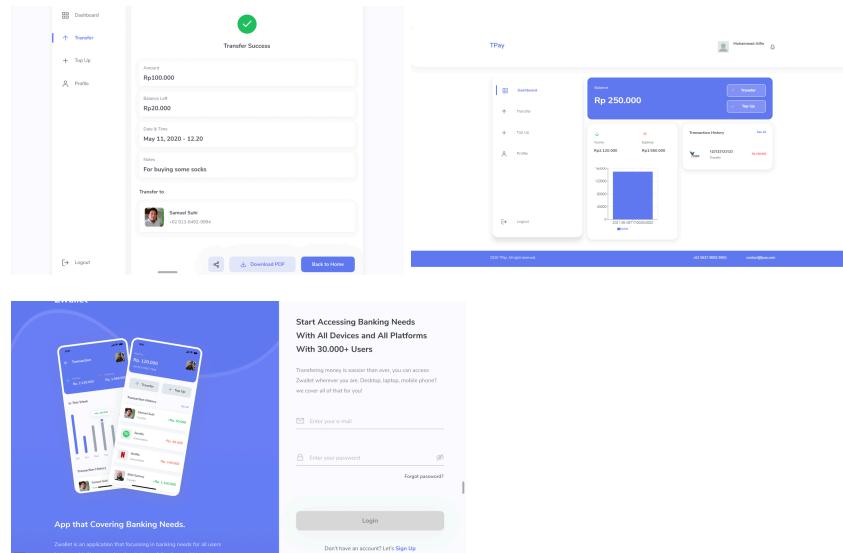

Github : <https://github.com/doyzfin/Frontend-teledemy>

Link : <https://teledemy.netlify.app/>

● Tpay

E-Wallet application with transfer, edit profile, and topup features. Using Next.Js for FrontEnd and Express.Js for Backend. This application was created within 1 week.
